

Amendments to Senate Bill No. 51
2nd Reading/2nd House Copy

Requested by Representative Scott Mendenhall

For the House Natural Resources Committee

Prepared by Krista Lee Evans
March 28, 2007 (8:36am)

1. Title, line 12.

Following: "REGULATIONS,"

Insert: "REQUIRING SUBDIVISION REGULATIONS TO IDENTIFY AREAS UNSUITABLE FOR DEVELOPMENT UNLESS CERTAIN MITIGATION MEASURES ARE TAKEN, INCLUDING USE OF CONSTRUCTION TECHNIQUES PROVIDED IN DEPARTMENT OF LABOR AND INDUSTRY ADMINISTRATIVE RULES; PROHIBITING A GOVERNING BODY FROM INCLUDING CERTAIN BUILDING REGULATIONS IN SUBDIVISION REGULATIONS; REQUIRING THE DEPARTMENT OF LABOR AND INDUSTRY TO ADOPT RULES THAT IDENTIFY CONSTRUCTION TECHNIQUES TO MITIGATE FIRE HAZARDS;"

2. Title, line 16.

Following: "76-3-504,"

Insert: "76-3-504,"

3. Page 7, following line 27.

Insert: "Section 3. Section 76-3-504, MCA, is amended to read:

"76-3-504. Subdivision regulations -- contents. (1) The subdivision regulations adopted under this chapter must, at a minimum:

(a) list the materials that must be included in a subdivision application in order for the application to be determined to contain the required elements for the purposes of the review required in 76-3-604(1);

(b) except as provided in 76-3-210, 76-3-509, or 76-3-609, require the subdivider to submit to the governing body an environmental assessment as prescribed in 76-3-603;

(c) establish procedures consistent with this chapter for the submission and review of subdivision applications and amended applications;

(d) prescribe the form and contents of preliminary plats and the documents to accompany final plats;

(e) provide for the identification of areas that, because of natural or human-caused hazards, are unsuitable for subdivision development, and The regulations must prohibit subdivisions in these areas unless the hazards can be eliminated or overcome by approved construction techniques; or other mitigation measures authorized under 76-3-608(4) and (5).

Approved construction techniques or other mitigation measures may

V3/28/07

not include building regulations as defined in 50-60-101 other than those identified by the department of labor and industry as provided in [section 5].

(f) prohibit subdivisions for building purposes in areas located within the floodway of a flood of 100-year frequency, as defined by Title 76, chapter 5, or determined to be subject to flooding by the governing body;

(g) prescribe standards for:

(i) the design and arrangement of lots, streets, and roads;

(ii) grading and drainage;

(iii) subject to the provisions of 76-3-511, water supply and sewage and solid waste disposal that meet the:

(A) regulations adopted by the department of environmental quality under 76-4-104 for subdivisions that will create one or more parcels containing less than 20 acres; and

(B) standards provided in 76-3-604 and 76-3-622 for subdivisions that will create one or more parcels containing 20 acres or more and less than 160 acres; and

(iv) the location and installation of public utilities;

(h) provide procedures for the administration of the park and open-space requirements of this chapter;

(i) provide for the review of subdivision applications by affected public utilities and those agencies of local, state, and federal government identified during the preapplication consultation conducted pursuant to subsection (1)(q) or those having a substantial interest in a proposed subdivision. A public utility or agency review may not delay the governing body's action on the application beyond the time limits specified in this chapter, and the failure of any agency to complete a review of an application may not be a basis for rejection of the application by the governing body.

(j) when a subdivision creates parcels with lot sizes averaging less than 5 acres, require the subdivider to:

(i) reserve all or a portion of the appropriation water rights owned by the owner of the land to be subdivided and transfer the water rights to a single entity for use by landowners within the subdivision who have a legal right to the water and reserve and sever any remaining surface water rights from the land;

(ii) if the land to be subdivided is subject to a contract or interest in a public or private entity formed to provide the use of a water right on the subdivision lots, establish a landowner's water use agreement administered through a single entity that specifies administration and the rights and responsibilities of landowners within the subdivision who have a legal right and access to the water; or

(iii) reserve and sever all surface water rights from the land;

(k) (i) except as provided in subsection (1)(k)(ii), require the subdivider to establish ditch easements in the

subdivision that:

(A) are in locations of appropriate topographic characteristics and sufficient width to allow the physical placement and unobstructed maintenance of open ditches or belowground pipelines for the delivery of water for irrigation to persons and lands legally entitled to the water under an appropriated water right or permit of an irrigation district or other private or public entity formed to provide for the use of the water right on the subdivision lots;

(B) are a sufficient distance from the centerline of the ditch to allow for construction, repair, maintenance, and inspection of the ditch; and

(C) prohibit the placement of structures or the planting of vegetation other than grass within the ditch easement without the written permission of the ditch owner.

(ii) Establishment of easements pursuant to this subsection (1)(k) is not required if:

(A) the average lot size is 1 acre or less and the subdivider provides for disclosure, in a manner acceptable to the governing body, that adequately notifies potential buyers of lots that are classified as irrigated land and may continue to be assessed for irrigation water delivery even though the water may not be deliverable; or

(B) the water rights are removed or the process has been initiated to remove the water rights from the subdivided land through an appropriate legal or administrative process and if the removal or intended removal is denoted on the preliminary plat. If removal of water rights is not complete upon filing of the final plat, the subdivider shall provide written notification to prospective buyers of the intent to remove the water right and shall document that intent, when applicable, in agreements and legal documents for related sales transactions.

(l) require the subdivider, unless otherwise provided for under separate written agreement or filed easement, to file and record ditch easements for unobstructed use and maintenance of existing water delivery ditches, pipelines, and facilities in the subdivision that are necessary to convey water through the subdivision to lands adjacent to or beyond the subdivision boundaries in quantities and in a manner that are consistent with historic and legal rights;

(m) require the subdivider to describe, dimension, and show public utility easements in the subdivision on the final plat in their true and correct location. The public utility easements must be of sufficient width to allow the physical placement and unobstructed maintenance of public utility facilities for the provision of public utility services within the subdivision.

(n) establish whether the governing body, its authorized agent or agency, or both will hold public hearings;

(o) establish procedures describing how the governing body or its agent or agency will address information presented at the

hearing or hearings held pursuant to 76-3-605 and 76-3-615;

(p) establish criteria that the governing body or reviewing authority will use to determine whether a proposed method of disposition using the exemptions provided in 76-3-201 or 76-3-207 is an attempt to evade the requirements of this chapter. The regulations must provide for an appeals process to the governing body if the reviewing authority is not the governing body.

(q) establish a preapplication process that:

(i) allows a subdivider to meet with the agent or agency, other than the governing body, that is designated by the governing body to review subdivision applications prior to the subdivider submitting the application;

(ii) requires, for informational purposes only, identification of the state laws, local regulations, and growth policy provisions, if a growth policy has been adopted, that may apply to the subdivision review process;

(iii) requires a list to be made available to the subdivider of the public utilities, those agencies of local, state, and federal government, and any other entities that may be contacted for comment on the subdivision application and the timeframes that the public utilities, agencies, and other entities are given to respond. If, during the review of the application, the agent or agency designated by the governing body contacts a public utility, agency, or other entity that was not included on the list originally made available to the subdivider, the agent or agency shall notify the subdivider of the contact and the timeframe for response.

(iv) requires that a preapplication meeting take place no more than 30 days from the date that the agent or agency receives a written request for a preapplication meeting from the subdivider; and

(v) establishes a time limit after a preapplication meeting by which an application must be submitted as provided in 76-3-604.

(2) In order to accomplish the purposes described in 76-3-501, the subdivision regulations adopted under 76-3-509 and this section may include provisions that are consistent with this section that promote cluster development.

(3) The governing body may establish deadlines for submittal of subdivision applications."

Insert: "(3) Rules promulgated under subsection (2) may be enforced only by a local government body as provided in Title 76."

5. Page 8, following line 22.

Insert: "NEW SECTION. **Section 5. Purpose -- rulemaking.** (1) The purpose of [sections 5 and 6] is to provide specific rulemaking authority to the department of labor and industry for the purposes of 76-3-504(1)(e).

(2) By October 1, 2008, the department shall adopt rules identifying appropriate construction techniques that may be used by a local government in mitigation of identified fire hazards pursuant to 76-3-504(1)(e). Rules adopted under this section may not be construed to be part of the state building code as provided in 50-60-203. The adoption, amendment, or repeal of a rule under this section is of significant public interest for the purposes of 2-3-103."

Insert: "NEW SECTION. **Section 6. Enforcement.** Rules promulgated under [section 5] may be enforced only as provided in Title 76, chapter 3, part 5. The powers and duties for enforcement provided in 76-3-501 apply to rules adopted under [section 5] and do not apply to or include any rules adopted under Title 50, chapter 60, parts 1 through 8."

Insert: "NEW SECTION. **Section 7. {standard} Codification instruction.** [Sections 5 and 6] are intended to be codified as an integral part of Title 50, chapter 60, and the provisions of Title 50, chapter 60, apply to [sections 5 and 6]."
